## Overview of Reconstruction and Stabilization Sectors

### PD565

This **two-and-a-half-day** course focuses on the key technical sectors in R&S (security, justice and reconciliation, economic stability and infrastructure, humanitarian assistance and social well-being, and governance and participation) and the interplay among them in reconstruction, stabilization and conflict transformation situations. This course uses scenarios to emphasize adaptation of technical skills to R&S environments and to consider tradeoffs that may be necessary among technical areas for better country-level results. This course will equip participants with knowledge needed to work across sectors, as well as across interagency and international boundaries.

#### **Course Objectives:**

- Identify and apply strategies for integrating and coordinating technical sector efforts to achieve more effective overall country-level R&S programming results  
Be familiar with the Essential Task Matrix (ETM) (including Security; Government and Participation; Humanitarian Assistance & Social Well-Being; Economic Stabilization & Infrastructure; and Justice & Reconciliation technical sectors) and related capabilities of interagency players and other partners
- Understand connections and relationships between sectors in the R&S setting

#### **Audience:**

This course is geared to an inter-agency audience, including DOS, USAID, DOD, DOJ, DOC, and others. Some knowledge or experience is preferred, either generally in reconstruction and stabilization in Washington or in the field, or specifically in one or more of the sectors. PD560 is a prerequisite, although exceptions may be made, depending on experience.

#### **Prerequisites:**

PD561 ***Coordination for Conflict and Instability: S/CRS and Interagency Response***

PD562 ***Interagency Planning for Conflict Transformation***

PD560 ***Interagency Reconstruction and Stabilization Response Operations***
